

****Please print, complete info below and mail with your tracing or guard****

All Cort models require that the original guard itself, or a 100% exact to scale fine line pencil tracing of the actual guard from the instrument be sent to us by mail. The most expeditious and preferred situation is to be sent the actual guard to work from. We are happy to accept a tracing to see if we have a pattern already that matches, but that process may take longer.

Tracing Instructions: The current guard needs to be removed from the instrument, all components taken off and the entire guard needs to be traced - all edges, routs, holes, etc. with a fine line (mechanical) pencil on plain bright white bond paper. Depending on the size of the guard, 2 pieces of paper may need to be taped together to get the entire image to fit well within the paper edges. Manila file folders can also be used for larger guards, but may be harder to fold. It is OK to fold the tracing - we are more concerned about the quality of the tracing - fine line detail is what we're looking for.

If nothing whatsoever of the original guard exists, please advise.

We have many versions of all Cort patterns but we may or may not already have a template for your instrument. Starting with a tracing will determine whether or not we will need your original guard sent to us. Sending the guard to us first thing saves time.
