

****Please print, complete info below and mail with your tracing****

All Aria models require that the original guard itself, or a 100% exact to scale fine line pencil tracing of the actual guard from the instrument be sent to us by mail. We prefer being sent the actual guard to work from, but will accept a tracing to see if we have a pattern already that matches. Even if the guard is broken or warped, please trace all that can be and thumbnail sketch in to the best of your ability the rest of the guard, including any other holes like knob or screw holes.

The current guard, if there is one, needs to be removed from the instrument, all components taken off and the entire guard needs to be traced - all edges, routs, holes, etc. with a fine line (mechanical) pencil on plain bright white bond paper. Depending on the size of the guard, 2 pieces of paper may need to be taped together to get the entire image to fit well within the paper edges. Manila file folders can also be used for larger guards, but may be harder to fold. It is OK to fold the tracing - we are more concerned about the quality of the tracing - fine line detail is what we're looking for.

If nothing whatsoever of the original guard exists, please contact us before sending any type of tracing other than that of the actual guard.

We have many versions of all Aria patterns and we may or may not already have a template for your instrument. Starting with a tracing will determine whether or not we will need your original guard sent to us.

Please complete the following:

Your name:

Your mailing address:

What is this a tracing of:

Brand name: **Aria** (include any others that appear on the headstock or elsewhere)

Model name:

Country of origin:

Year of manufacture:

A phone number and email address to contact you:

Send via First Class Mail to:
